

Understand a Meteora launch before you trade.

Turn a token or pool address into a clear review of fees, token controls and liquidity.

[Live at dbc.whoim.space](https://dbc.whoim.space)

You found the token. Now understand the launch.

Before their first trade, people want answers.

01 / CONTROL

Who controls
the token?

02 / COSTS

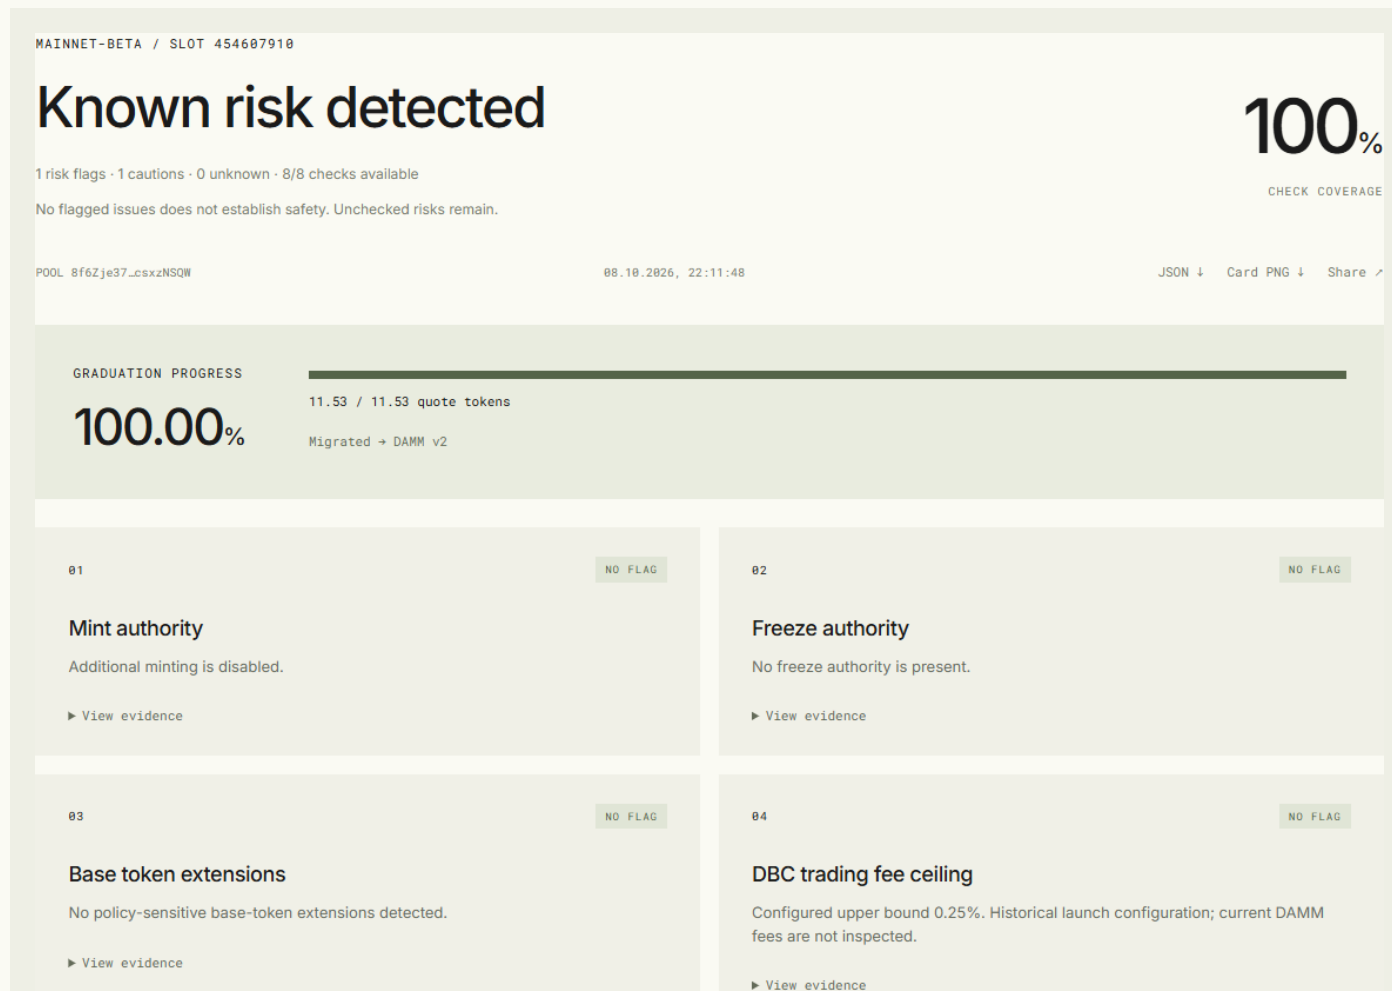

What fees
apply?

03 / LIQUIDITY

What happens
to liquidity?

One address. A clearer picture.

- 01 Paste a token or pool address.
- 02 Get eight clear checks in one report.
- 03 Explore the findings that matter to you.

Understand what shapes the launch.

The important choices, brought together in a readable review.

01 **Token controls**

Understand who can change the token.

02 **Trading fees**

See the costs set for the launch.

03 **Creator allocations**

Explore the creator's share and release schedule.

04 **Liquidity commitments**

Review the launch's liquidity allocations.

05 **Launch progress**

See where the launch stands and what comes next.

Flexible launches deserve clear explanations.

Meteora gives creators flexibility in how they launch tokens.

DBC Guard helps people understand those choices before participating.

A focused view of the launch.
